HBPC	Ironing Board Pad and Cover	20.48

### HIDE-A-BOARD® SIMPLE INSTALLATION

1. Select a convenient location near an electrical outlet.
2. Locate a space between wall studs that is at least 14-1/4" wide and free of plumbing & electrical wiring.
3. Determine the desired working height for the ironing board that is right for you and subtract 9 inches.  
*This will be the bottom of the rough opening.*
4. Mark the edges of the rough opening on the wall.  
**Rough opening: 14-1/4"x48".**
5. Use a small saw, cut the rough opening for the unit.
6. Push the HIDE-A-BOARD® firmly into the rough opening, making sure that the built in trim is touching the wall.
7. Attach the cabinet to the wall studs through the sides with the screws provided.
8. Mount the door with the hinges provided for either a left or a right hand swing.
9. Ready to be finished to match your decor.

#195-BS

## **NEW!** Hide-A-Board® 3in1

170148	Flex tubing 2" x 50' roll for vac pan (sold per foot)	<b>1.84 Ft.</b>

### BETTER FILTRATION

- Two-stage microfiltration system with HEPA Triumph™ secondary filter captures the finest of particles – even as small as 0.3 microns.
- Easier to empty than "bagless" versions. Why fuss with a "bucket of dirt" when you can quickly and easily dispose of a bag?
- Collection bags only need to be changed every six to 12 months.
- Protects the motor and exhausts only clean air.

1. Intake dirtladen air
2. First stage microfilter collector bag (replaceable)
3. Second stage HEPA Triumph (permanent) – cloth media acts as a net to support the microfilter collector
4. Motor
5. Clean air exhaust
